SUMMARY

AI Engineer with 2.5+ years shipping LLM-powered products into production across fintech and media platforms. Own features end-to-end, from retrieval and agent design to deployment and monitoring on AWS, delivering double-digit cost savings and 10x faster workflows while partnering with cross-functional teams.

EXPERIENCE

Kissht (Si Creva Capital Services Pvt. Ltd.) **Apr 2026 – Present**
Senior Data Scientist *Gurugram, Haryana*

- Led delivery of a unified ML feature store, collaborating across Digi, Underwriting, LMS, and DevOps teams to fix legacy point-in-time reproducibility of scoring feature values, raising it from **70% to 98%+** and shrinking onboarding time by **60%**.
- Built *ML-Central*, a Dockerized single source of truth housing all feature and target code across teams to eliminate version drift, spinning on-demand Amazon ECS tasks to score transactions predating each model's go-live date (legacy backfill) while cutting infrastructure costs by **40%** across **15+ models**.
- Synced model scoring outputs directly to Snowflake, accelerating backend retrieval and improving query performance across **60M+** financial records.
- Established real-time MLOps observability across the production fleet by deploying containerized monitoring (MLflow, Streamlit) on Amazon ECS with scheduled audit DAGs, reducing undetected failures by **85%**.
- Streamlined custom data-scoring workflows for business teams by building a self-service pipeline with integrated email delivery, dropping processing latency from **5 hours to 30 minutes**.

DevSecOps **Aug 2025 – Apr 2026**
AI Engineer *Remote*

- Architected automated extraction pipelines processing **80K+ news articles daily**, ensuring continuous data synchronization for deal creation.
- Developed a multi-agent sourcing service using **LangGraph** and **Crawl4AI**, automating newsletters and RSS feeds for **400K+ companies**.
- Delivered scalable microservices with Hugging Face models for CAPTCHA solving, processing **10K+ unstructured documents daily** with **95%** accuracy.
- Designed an internal Query Planner Agent using **LangChain** and **MongoDB MCP** to automate SQL/NoSQL retrievals, clearing **100%** of the researcher backlog.
- Created an observability dashboard enabling teams to validate data integrity and reduce incident detection time by **90%**.

Hindustan Times **Jul 2024 – Aug 2025**
Software Engineer *Gurugram, Haryana*

- Engineered an NLP-driven global search service (LangGraph, function calling over MongoDB indexes) handling **50K+ daily requests**, trimming query latency from 10s to 2s and driving a **90% click-through rate**.
- Deployed autonomous **Tesseract** OCR pipelines for 20+ document types, reducing manual data entry effort by **60%**.
- Orchestrated a distributed network of 30+ web crawlers, scaling collection to expand market coverage by **40%**.
- Shipped a conversational RAG chatbot with custom agentic frameworks, boosting user engagement by **25%** and retention by **15%**.
- Optimized critical ETL workflows using **AWS Airflow** and implemented pipeline alerting, cutting data processing latency by **35%** and slashing failure recovery time to $<$**10 minutes**.

TECHNICAL SKILLS

GenAI & LLM: RAG, chunking, agentic & multi-agent workflows (LangGraph, LangChain), function calling, prompt engineering, structured outputs, fine-tuning, MCP, Hugging Face, LangSmith, MLOps
ML & Data: embeddings, vector search, OCR & document processing, model serving (MLflow), Pinecone, FAISS
Languages & Frameworks: Python, C++, Go, SQL; Flask, Streamlit, Crawl4AI, Selenium, Puppeteer
Data & Cloud: MongoDB, MySQL, Redis, Snowflake, Elasticsearch; AWS (Lambda, SageMaker, ECS, S3, DynamoDB, CloudWatch)
DevOps & Systems: Docker, Kubernetes, Jenkins, Kafka, Airflow, Git, Linux, REST APIs, Microservices, Distributed Systems

EDUCATION

Thapar Institute of Engineering and Technology, Patiala, Punjab **Jun 2020 – Jun 2024**
Bachelor of Engineering in Computer Science and Engineering
